

Design Solutions: Beam Positioner

Unique to IRCO, the Beam Positioner can lift, rotate and tilt to allow optimal weld positioning. Its heavy duty design makes it ideally suited for manipulating tanks, trucks, trains, buckets etc. Its wide range of motion makes it extremely versatile and IRCO Beam Positioners can be found in almost every industrial sector.

The main beam has three distinct movements; elevation, tilt and rotation. The optional roto-table provides a fourth axis, allowing the table to rotate 360°. The Beam Positioner is available in load capacities ranging from 1,500 to 120,000 lbs.

If you would like more information about this Beam Positioner, please contact IRCO Automation at 1-800-742-1175 or info@ircoautomation.com.

About IRCO: Company Profile

IRCO Automation Inc. designs and manufactures positioning equipment for industrial welding and fabricating. IRCO machines can be found all over the world operating in the toughest environments. Our machines are used in; oil & gas, manufacturing; shipbuilding, rail & transportation, fabricated metal products, mining and energy.

IRCO is part of the RoMan Family of Companies, including RoMan Engineering Services and their welding engineering team. This combined expertise allows IRCO to provide the most practical and effective welding solutions for our clients.

Equipment Offerings

We offer a wide range of equipment in various sizes and load capacities. Our catalogue includes:

- Welding Positioners
- Turning Rolls
- Manipulators
- Gantrys
- Weld Lathes
- Three O'Clock Welders
- Longitudinal Seam Welders
- Head and Tailstocks
- Turntables
- Beam Positioners

The Advantages of Positioning Equipment

Positioning equipment allows for the optimal placement of work pieces to ensure the quickest and most efficient welding process. Properly installed positioning equipment can speed up production / fabrication, increase safety and save money.

What We Deliver

IRCO provides rugged positioning and productivity solutions for welding applications. Some of our machines are still in use almost 50 years after they were first sold. We offer a huge selection of standard products as well as customized design solutions. In addition to new equipment sales, we supply refurbishment services, rentals and used equipment.
